

About Us

MALTCP is a Missouri professional organization committed to the continuous improvement of quality care across the long-term care continuum, by providing advocacy, education, and professional development services for medical directors, physicians, practitioners and other healthcare team members. MALTCP advances its mission by collaborating with other groups involved in long-term care. The Missouri Association of Long Physicians believes it is important to support all long term care professionals with information, education and access to resources. MALTCP supports and promotes leadership and education for best practices, evidence-based medicine and regulatory compliance.
